

1. Employee Login – Required Changes

Functional Fixes

- 1. “Remember Me” is not working — fix the functionality so the session persists correctly.**
- 2. “Forgot Password” button is not functioning — implement proper routing + working recovery flow.**

UI/UX Updates

- 3. Remove the text: “Don’t have an account? Create Account”.**
- 4. Replace “Sign in here” → “Login here”.**
- 5. Replace “Please enter your details to sign in” → “Please enter your details to access the dashboard”.**
- 6. Change “Employee ID” → “Employee ID / Email / Phone No.”.**
- 7. Banner image update: Add *Chitra Gupta* with black background.**
- 8. Increase the logo size for better visibility.**
- 9. Add footer text: “Powered by Neural Info Solution”.**

Login Enhancement

- 10. Enable email login using both:**

- OTP**
 - Password**
-

2. Job Field – Required Changes

Each job post should display the following fields clearly:

- 1. Date of Publishing**
- 2. Job Title**
- 3. Functional Area**
- 4. State**
- 5. City**
- 6. Experience**
- 7. Share Button with Icon**

Share Button Behavior

- On clicking the Share button, open the official ACFL LinkedIn profile.**
-

3. Messaging System – Required Changes

- 1. The messaging/notification area must be clear, visible, and properly highlighted.**
 - 2. After *any action* (login, save, update, delete):**
 - The popup/alert should appear instantly.**
 - The message should remain visible for 30 seconds before auto-hide.**
-

4. Appraisal Module – Required Changes (Improved English Version)

Menu Structure (Dropdown)

- Self-Appraisal**
- KPI**
- Form C**

Flow & Restrictions

- 1. Employee must complete Self-Appraisal first.**
- 2. Only after completing it, KPI should become clickable.**
- 3. After KPI is completed, Form C becomes accessible.**

Restriction Behavior

- The next form must remain disabled / cursor not allowed until the previous form is completed.**
 - Clicking the next form should be impossible unless the previous step is marked “Completed”.**
-

5. Employee Dashboard – Required Changes

- 1. Remove unnecessary items:**
 - Export**
 - Collapse**
 - Date filter**
 - 2. Notifications should be displayed at the top of the dashboard for quick visibility.**
-

6. Employee Card – Required Changes

UI/UX Fixes

- 1. Remove the Designation from the employee card.**
- 2. On hover over the Eye icon, open a modal showing complete employee details.**

3. Mask phone number — show last 4 digits hidden (e.g., 98765XXXX); reveal full number only on click.
4. Replace “Branch” → “Local City and State”, and show it where “Report Office” was displayed.

Additional Information to Display

5. Along with Joined On, display:
 - Total tenure of the employee (e.g., “3 Years 4 Months”).
6. Show Controlling Officer name.
7. Show Reviewing Officer name.
 - Each officer must have an Eye icon.
 - On hover → show their details in a modal.

Fields to Show on Employee Card

- Employee ID
 - Employee Name
 - Mobile Number
 - Email
 - Department
 - Image
-

7. Notification Enhancements

Types of Notifications

1. General Updates / Broadcast Messages
 - Manually shared important information for all employees.
 2. Event-Related Notifications
 - Festivals, celebrations, company activities.
 3. Action Notifications (Leave Requests)
 - Leave request submitted
 - Leave approval / rejection updates
-

8. Confirmation Modal

Add a new confirmation modal with three buttons:

- Review
 - Cancel
 - Yes
-

9. Job List Enhancements

- 1. Add a Share Icon and a Copy Icon.**
- 2. Both actions must open the confirmation modal before performing the action.**

Unpublished Job Handling

- Add a feature to delete unpublished jobs safely with a confirmation modal.**
